

BABY EXPO WASTE POLICY

There are lots of places to tackle waste at events, but the main source is from the Vendors operating during the festival. As part of the waste minimization process, we want to work with Vendors to ensure the event goes well and waste is diverted from landfill. We need everybody on-board working with us to ensure that the packaging brought on-site can be reused, composted or recycled rather than disposed of in a landfill.

Each venue and region is set to cater to different waste strategies. Confidence levels are low when it comes to utilising the Compost/Organic waste stream - we're working to educate the public in an effort to maximise the benefit of Composting. As you may be aware, each region accepts different items at their compost facility. At the Baby Expo, NO PLA or other compostable plastic is accepted.

- Tasting cups, these must be paper – and you can order through us at a discounted rate of \$10 / 250 cups
- Serveware - must be compostable - we have organised an exclusive arrangement for compostable product supply from Innocent Packaging - [click here to view the range](#) - contact Erin directly (erin@innocentpackaging.co.nz) and receive 25% off the Wholesale price listed.
- NO PLA or any other Compostable Plastic is accepted.
- We will be removing non-compliant packaging seen at the Expo and charging for disposal.

IMPORTANT
PACK OUT - your stand must be left as you found it (clean, tidy and clear of any rubbish). Any mess left behind will incur a Waste charge invoiced directly to the Vendor.
